

Review Game: True or False Toss

In this activity children determine whether a statement is true or false and then toss an object into a container to score a point.

In the example above I used two of my big white plastic bowls from the kitchen for the containers and I rolled up a pair of socks to have something soft to toss.

This is a simple idea that can be adapted to any story and age group.

I like it because it can be set up absolutely anywhere using objects that are easily available.
