

Make your own Finger Puppets

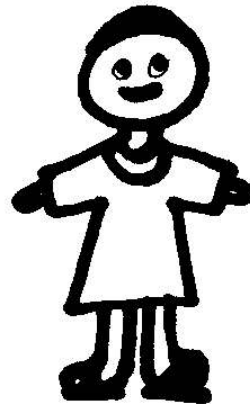

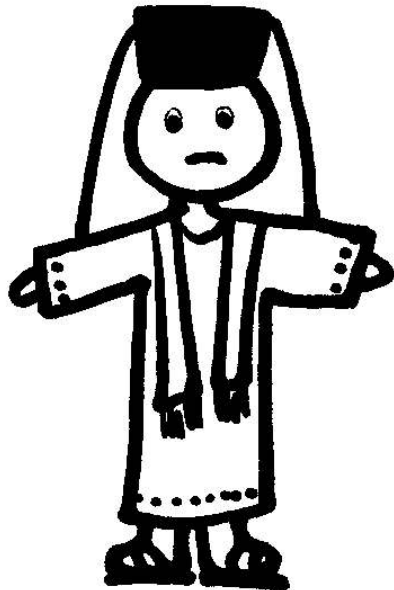

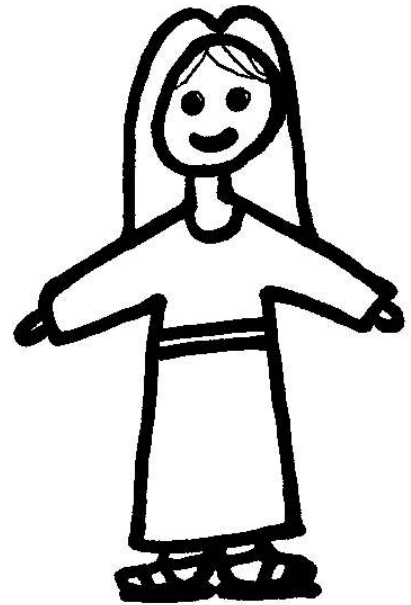

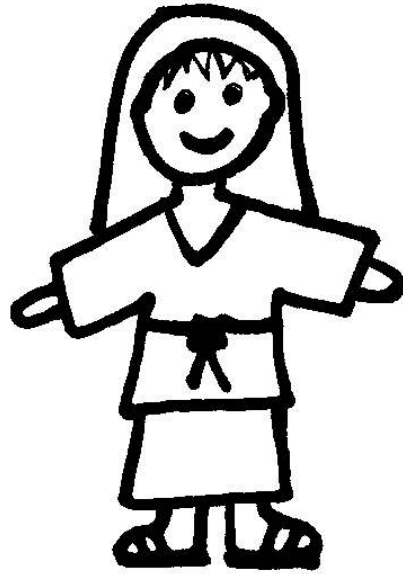

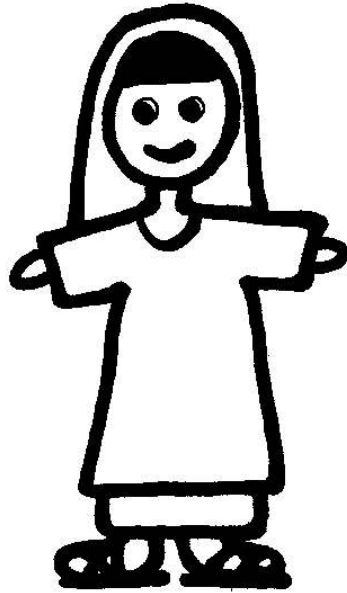

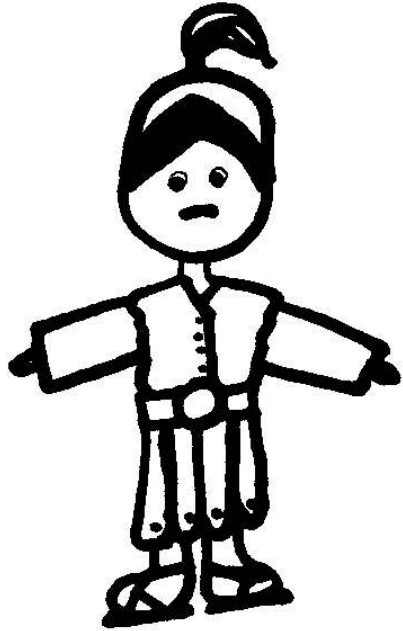

1. Fill in faces and add details to the clothing so that the puppet will represent the characters in the story you want to tell.
2. Cut the characters out leaving space on either side.
3. Wrap the paper around your finger and attach at the back with tape.
4. Use your puppets to act out the story.

You could also attach the puppets to craft sticks, plastic spoons, straws, a pencil or something similar.
